Use caution when cutting banding!

Before cutting banding-

- Inspect stack or bundle for potential unstable or loose materials.
- Secure unstable or loose materials.

Whipping or springing action can occur when cutting banding resulting in injuries-

- Wear eye protection. A full-face shield is even better.
- Wear leather work gloves or comparable material.
- Maintain a safe distance- keep clear of whipping or springing action. Use long-handle cutter so you maintain a safe distance.
- Keep face and body clear of banding whipping or springing.
- Avoid standing directly in front of banding. Preferably stand to one side of the banding.

Rockwood Casualty Insurance Company (Rockwood) may provide safety management services to its insureds in order to reduce the risk of loss that may lead to insurance claims. The information and advice we provide is not intended to include all possible safety measures and controls. Rockwood does not warrant that losses and claims will be avoided or mitigated if our recommendations are followed. The safety management services we provide do not relieve the insured of its own duties and obligations with regard to safety matters, nor does Rockwood guarantee to the insured or others that the insured’s property and/or operations are safe, healthful, or in compliance with applicable laws, regulations or standards. The insured remains responsible for its own operations, safety practices and procedures and should consult with legal counsel and safety professionals, of its own choosing, as it deems appropriate.
