Hand Tool Safety
Cutting Tools

- Always wear approved eye protection.
- Select the correct cutting tool for the job.
- Do not use if cutters are cracked, broken, loose or have excessive wear.
- Do not exceed the recommended capacity of the tool.
- Do not pry or twist the tool when cutting.
- Do not use a hammer or extend the handle length to achieve greater cutting power.
- Keep cutting tools sharp and cover sharp edges with suitable cover to protect the tool and to prevent injuries from unintended contact.
- If tool is equipped with a handle or grip area, do not use if cracked, splintered or has excessive wear.

Rockwood Casualty Insurance Company (Rockwood) may provide safety management services to its insureds in order to reduce the risk of loss that may lead to insurance claims. The information and advice we provide is not intended to include all possible safety measures and controls. Rockwood does not warrant that losses and claims will be avoided or mitigated if our recommendations are followed. The safety management services we provide do not relieve the insured of its own duties and obligations with regard to safety matters, nor does Rockwood guarantee to the insured or others that the insured’s property and/or operations are safe, healthful, or in compliance with applicable laws, regulations or standards. The insured remains responsible for its own operations, safety practices and procedures and should consult with legal counsel and safety professionals, of its own choosing, as it deems appropriate.
