Hand Tool Safety
Striking Tools

- Always wear approved eye protection.
- Do not use striking tool if head or striking area is mushroomed, dented, chipped, cracked or excessive wear.
- Do not use striking tool if handle is loose, cracked, splintered, or excessive wear.
- Strike with a square blow with the striking surface parallel to the surface being struck. Always avoid glancing blows and over and under strikes.
- Keep other workers clear of the work area.
- Survey the area or material you wish to use the striking tool on. Check for hazards or defects in the material or area.

Rockwood Casualty Insurance Company (Rockwood) may provide safety management services to its insureds in order to reduce the risk of loss that may lead to insurance claims. The information and advice we provide is not intended to include all possible safety measures and controls. Rockwood does not warrant that losses and claims will be avoided or mitigated if our recommendations are followed. The safety management services we provide do not relieve the insured of its own duties and obligations with regard to safety matters, nor does Rockwood guarantee to the insured or others that the insured’s property and/or operations are safe, healthful, or in compliance with applicable laws, regulations or standards. The insured remains responsible for its own operations, safety practices and procedures and should consult with legal counsel and safety professionals, of its own choosing, as it deems appropriate.
