## Eye Protection

30

- 1) What hazards are involved with not wearing your eye protection?
  - a. Loss of eye sight
    - i. Flying debris
    - ii. Fumes
    - iii. Sparks
    - iv. Flash
  
- 2) What eye hazards should be recognized?
  - a. No shielding
  - b. Poor ventilation
  - c. Spraying chemicals
  - d. Flying particulates
  - e. Sparks
  - f. Fumes
  
- 3) What safe practices should be used?
  - a. Signs should be posted where eye protection is required
  - b. Areas should be re-evaluated for PPE when new processes are introduced
  - c. Safety glasses and goggles should have side shields
  - d. All people near welding areas should be protected by a welding shield or flash curtains
  - e. Read all labels before spraying paints or other chemicals
  - f. Before spraying, note air flow
  - g. Keep your safety glasses and other PPE clean and in good condition
  - h. Use shields on equipment - don't rely solely on your safety glasses
  
- 4) Do we have curtains or panels around welding areas?
- 5) Where is our eye washing station/kit?
- 6) Are there any areas where eye protection should be required where it currently is not?
- 7) Give an example of the different types of eye protection and the application where it should be used.

Rockwood Casualty Insurance Company (Rockwood) may provide safety management services to its insureds in order to reduce the risk of loss that may lead to insurance claims. The information and advice we provide is not intended to include all possible safety measures and controls. Rockwood does not warrant that losses and claims will be avoided or mitigated if our recommendations are followed. The safety management services we provide do not relieve the insured of its own duties and obligations with regard to safety matters, nor does Rockwood guarantee to the insured or others that the insured's property and/or operations are safe, healthful, or in compliance with applicable laws, regulations or standards. The insured remains responsible for its own operations, safety practices and procedures and should consult with legal counsel and safety professionals, of its own choosing, as it deems appropriate.

## Eye Protection

**Make Time for Safety, Everyday!** – Yes, production is important, *but the focus must be on Safe Production!* Keep that in the back of your mind. Don't take risky chances and stay out of harm's way. Nobody goes to work thinking 'I'm going to get hurt or killed on the job today!' But every day 15,000-17,000 workers suffer disabling injuries on the job and another 11-17 are killed. ***What are you doing to make sure it doesn't happen on your shift?***

***Keep stoking the fire; we can't let the 'Safety Train' run out of steam!***
