

# Toolbox Safety Talks

## Signage

- 1)** What are the positives and negatives involved with signage?
  - a. Missing signs
    - Not being aware of a predetermined hazard
  - b. Signs in place
    - Get you thinking
    - Caution yourself and others
    - Prevention
  
- 2)** What hazards should signs recognize?
  - a. Safety reminders
  - b. Hazardous areas
  
- 3)** What safe practices should be used?
  - a. Avoid confusion by using signage standards such as ANSI
  - b. Use sign size, shape, and color to get the point across
  - c. Place signs where they will do the most good, not where they will best fit
  - d. Use signs to remind, warn, and direct
  
- 4)** Are there any areas on our site where signs have fallen down, faded, or are no longer in place?
- 5)** Are there any areas where there has never been a sign that you believe one should be posted?
- 6)** Do we use standardized signage?
- 7)** Has anyone ever been injured or had a near miss due to not seeing a sign, or because there was no sign at all?

# Toolbox Safety Talks

## Signage

**Make Time for Safety, Everyday!** – Yes, production is important, *but the focus must be on Safe Production!* Keep that in the back of your mind. Don't take risky chances and stay out of harm's way. Nobody goes to work thinking 'I'm going to get hurt or killed on the job today!' But every day 15,000-17,000 workers suffer disabling injuries on the job and another 11-17 are killed. *What are you doing to make sure it doesn't happen on your shift?*

***Keep stoking the fire; we can't let the 'Safety Train' run out of steam!***
