

Toolbox Safety Talks

Hearing Protection II

- 1) What are the hazards involved with loud noise?
 - a. Loss or reduced hearing

- 2) What noise hazards should be noticed?
 - a. Machinery or equipment
 - b. Ability to talk to co-workers
 - c. Proper hearing protection
 - d. Proper use of hearing protection

- 3) What safe practices should you be aware of?
 - a. Always wear earplugs when exposed to noise for periods of time
 - b. Reduce exposure to noise outside of the workplace
 - c. Use sound-absorbing materials
 - d. Do not use several noisy machines at once
 - e. Do not drown out unwanted noise with other sounds
 - f. If at risk for hearing loss, have your hearing tested once a year
 - g. Determining the proper hearing protection depends on a number of factors, including:
 - i. The loudness of noise as measured in decibels
 - ii. The duration of your exposure to noise
 - iii. Movement between work areas with different noise levels
 - iv. Whether noise is generated from one or multiple sources

Rule of thumb: If you have to raise your voice to be heard clearly, you should be wearing hearing protection!

- 4) Which of our equipment or machines must you wear hearing protection around?
- 5) Do we need to reevaluate any of our equipment or machines noise levels?
- 6) Is there a way to eliminate noise exposure here at our site?
- 7) Does anyone here have any problems with their hearing?
- 8) Can someone demonstrate and explain the proper way to insert an earplug?

Rockwood Casualty Insurance Company (Rockwood) may provide safety management services to its insureds in order to reduce the risk of loss that may lead to insurance claims. The information and advice we provide is not intended to include all possible safety measures and controls. Rockwood does not warrant that losses and claims will be avoided or mitigated if our recommendations are followed. The safety management services we provide do not relieve the insured of its own duties and obligations with regard to safety matters, nor does Rockwood guarantee to the insured or others that the insured's property and/or operations are safe, healthful, or in compliance with applicable laws, regulations or standards. The insured remains responsible for its own operations, safety practices and procedures and should consult with legal counsel and safety professionals, of its own choosing, as it deems appropriate.

Hearing Protection II

Make Time for Safety, Everyday! – Yes, production is important, *but the focus must be on Safe Production!* Keep that in the back of your mind. Don't take risky chances and stay out of harm's way. Nobody goes to work thinking *'I'm going to get hurt or killed on the job, today!'* But every day 15,000-17,000 workers suffer disabling injuries on the job and another 11-17 are killed. ***What are you doing to make sure it doesn't happen on your shift?***

Keep stoking the fire; we can't let the 'Safety Train' run out of steam!
