TARGET STATES

Why Is Rockwood Different?

We offer industry-certified in-house safety engineers dedicated to your business. We conduct physical inspections that will help identify and eliminate loss potentials.

We have the largest number of industry-specific dedicated personnel on each account program, focused on service well beyond the policy's purchase.

Our insurance programs are customized, allowing policyholders to closely align workers' compensation costs to employees' individual claim experiences.

We are a true workers' compensation partner. Policyholders participate in decisions about claim resolutions, amounts that are paid and amounts held in reserve to pay claims.

We conduct periodic claim, loss-control, and program reviews and run a monthly program analysis.

You have access to our client system for real-time updates and information.

Argo Group's insurance subsidiaries are rated A. M. Best "A-" (Excellent) and S&P "A-" (Strong).

Contact us today for more information about our program or a quote on your next renewals:
