Forward-Looking Statements

This presentation may include forward-looking statements, both with respect to Argo Group and its industry, that reflect our current views with respect to future events and financial performance. These statements are made pursuant to the safe harbor provisions of the Private Securities Litigation Reform Act of 1995. Forward-looking statements include all statements that do not relate solely to historical or current facts, and can be identified by the use of words such as “expect,” “intend,” “plan,” “believe,” “do not believe,” “aim,” “project,” “anticipate,” “seek,” “will,” “likely,” “assume,” “estimate,” “may,” “continue,” “guidance,” “objective,” “outlook,” “trends,” “future,” “could,” “would,” “should,” “target,” “on track,” and similar expressions of a future or forward-looking nature. All forward-looking statements address matters that involve risks

and uncertainties, many of which are beyond Argo Group’s control.

Accordingly, there are or will be important factors that could cause actual results to differ materially from those indicated in such statements and, therefore, you should not place undue reliance on any such statements.

We believe that these factors include, but are not limited to, the following:

- 1) unpredictability and severity of catastrophic events;
- 2) rating agency actions;
- 3) adequacy of our risk management and loss limitation methods;
- 4) cyclical nature of demand and pricing in the insurance and reinsurance markets;
- 5) statutory or regulatory developments including tax policy, reinsurance and other regulatory matters;
- 6) our ability to implement our business strategy;
- 7) adequacy of our loss reserves;
- 8) continued availability of capital and finance;
- 9) retention of key personnel;
- 10) competition;
- 11) potential loss of business from one or more major insurance or reinsurance brokers;
- 12) our ability to implement, successfully and on a timely basis, complex infrastructure, distribution capabilities, systems, procedures, and internal controls, and to develop accurate actuarial data to support the business and regulatory and reporting requirements;
- 13) general economic and market conditions (including inflation, volatility in the credit and capital markets, interest rates, and foreign currency exchange rates);
- 14) the integration of businesses we may acquire or new business ventures we may start;

- 15) the effect on our investment portfolios of changing financial market conditions including inflation, interest rates, liquidity and other factors;
- 16) acts of terrorism or outbreak of war; and
- 17) availability of reinsurance and retrocessional coverage, as well as management’s response to any of the aforementioned factors.

In addition, any estimates relating to loss events involve the exercise of considerable judgments and reflect a combination of ground-up evaluations, information available to date from brokers and pedants, market intelligence, initial tentative loss reports, and other sources. The actuarial range of reserves and management’s best estimate is based on our then-current state of knowledge including explicit and implicit assumptions relating to the pattern of claim development, the expected ultimate settlement amount, inflation and dependencies between lines of business. Our internal capital model is used to consider the distribution for reserving risk around this best estimate and predict the potential range of outcomes. However, due to the complexity of factors contributing to the losses and preliminary nature of the information used to prepare these estimates, there can be no assurance that Argo Group’s ultimate losses will remain within the stated amount.

The foregoing review of important factors should not be construed as exhaustive and should be read in conjunction with the other cautionary statements that are included herein and elsewhere, including the risk factors included in our most recent reports on Form 10-K and Form 10-Q and other documents of Argo Group on file with or furnished to the U.S. Securities and Exchange Commissions (“SEC”). Any forward-looking statements made in this presentation are qualified by these cautionary statements, and there can be no assurance that the actual results or developments anticipated by Argo Group will be realized, or even if substantially realized, that they will have the expected consequences to, or effects on, Argo Group or its business or operations. Except as required by law, Argo Group undertakes no obligation to update publicly or revise forward-looking statements, whether as a result of new information, future developments or otherwise.

Differentiated Approach to Digital Innovation

Through iterative tech product development, investments and partnerships, we leverage advancements in digital technology to enhance customer intimacy, increase automation, improve risk selection and enter new markets.

How we are organized

- Cross-functional product squads, each focused on solving a particular user-focused pain point
- Squads are comprised of product owners, engineers, data scientists, and designers
- Early-stage investment team with investing, operating, and industry expertise

How we work

- Hypothesis-driven, iterative approach to building digital products
- Prioritize opportunities that can generate 2x-10x return on invested capital
- Decisions grounded in a bottom-up, internally developed thesis on how technology will impact the commercial insurance ecosystem
- Partner with and invest in external ventures that can further enable our Digital approach

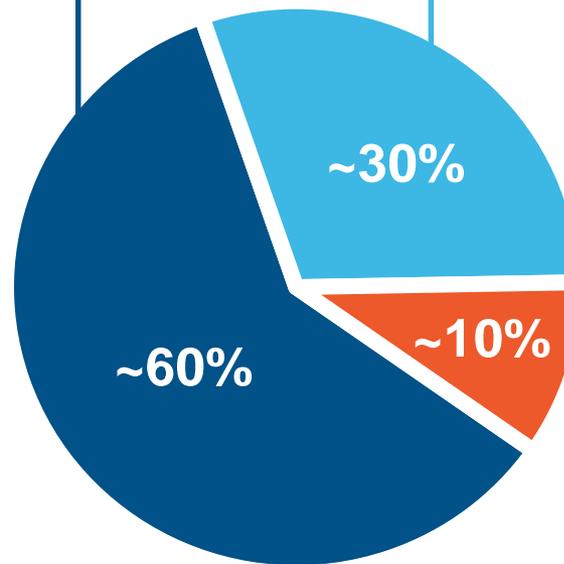

Our Focus

- Leverage new data sources, machine learning, and predictive analytics to enable faster and smarter underwriting
- More efficiently, with regards to both time and cost, connect to distribution partners digitally
- Automate internal processes and workflows
- Explore emerging tech-enabled categories

Digital Transformation Outcomes

Transform Core Business

- Processed over **\$1.4B GWP** through our flagship policy administration platform, currently supporting 14 products
- Launched **Argo Risk Tech**, a custom, sensor-based technology that allows retail merchants to manage risk through reduction in on-premises accidents. Achieved full year loss reduction and expense reduction for Argo Insurance.
- Partnered with **Coalition**, a startup cybersecurity MGA, for our cyber book
- Continued growth in our digitization of our Casualty business to 50% of our brokers getting self-service quotes with 80% being full automated.
- Launched a fully digital self-service management liability product for a key partner 3 months ahead of schedule now driving MoM self-service GWP growth.
- Built a **data platform** for the retrieval, processing, and machine learning on proprietary and external data sources
- Launched our first predictive analytics tool for D&O underwriters using machine learning
- Employed robotic process automation (**RPA**) across multiple use cases

Explore Adjacencies

- Built a self-serve **digital portal** driving engagement with Argo's brokers and insureds which continues to see engagement increase QonQ. Expanded use to new business units.
- Announced our partnership with Corvus, on their Smart Cargo Insurance product designed to help food and beverage companies reduce loss of perishable goods
- Invested in a startup helping brokers focus on risk advisory through custom built digital tools and automation of back-office tasks

Disrupt Traditional Insurance

- Incubated a Brazil-based startup focused on enabling stronger membership engagement for affinity groups and associations - 58 corporate clients signed up as of 2018 YE, representing **~1.6M users**
- Exploring ways to use **blockchain** for insurance applications
- Leveraged our quick quote applications into a new platform which will allow us to launch new digital self-service lines quickly including into new areas of business with minimal operational staff
