

Storage Tank Pollution Coverage

Argo Environmental offers comprehensive coverage solutions for above-ground and underground storage tanks.

Argo Environmental's two coverage options include corrective action (cleanup) costs and third-party liability.

Our Products

Broad-Form Coverage: The coverage trigger is "release" of a petroleum product. Argo Environmental will investigate a suspected release.

Basic-Form Coverage: The coverage trigger is "confirmed release" of a petroleum product. Insured must identify the source of release. Investigative costs are covered if release is confirmed.

Key Coverage Highlights

- Minimum premium is \$500
- Limits up to \$1 million per claim/\$2 million aggregate
- Per location limits of \$1 million available (up to \$10 million aggregate)
- Limits matching state fund deductibles available
- Defense costs are outside the policy limits
- Deductibles as low as \$1,000
- Includes approved certificates to satisfy financial responsibility

Optional Coverage

- Storage Tank Repair and Replacement – Covers necessary costs to repair or replace underground tanks as a result of a covered release
 - Limits: \$25,000 with \$2,500 deductible or \$50,000 with \$5,000 deductible
- Business Interruption and Extra Expense – Covers business interruption and extra expense loss resulting from a covered release
 - Limits: \$25,000 with \$2,500 deductible or \$50,000 with \$5,000 deductible
